Goal: Junior Front-End Developer

ReactJS | Angular | TypeScript | Bootstrap

Summary

Graduating in Computer Science, my goal is to master the entire stack that I believe I'm able to contribute to modern applications – with a good experience and striving to improve mainly in Angular, React and TypeScript.

Passionate about technology from an early age, I have a natural interest in innovation and building my career in this field. I am currently looking for an opportunity to join a development team, with the personal goal of contributing with my knowledge, love for the field, and eagerness to learn.

Knowledge

- Programming Languages and Frameworks: Angular, React, TypeScript, JavaScript, HTML, CSS, Java.
- Code Versioning: Git.
- Languages: English (advanced).

Experiences

Freelancer (2021 - 2022)

- I have developed a variety of freelance projects in the front-end area using mainly VueJS, ReactJS and TypeScript always striving for an innovative and efficient interface.

IT Intern (2024 - current)

- I assist all areas of the unit with IT infrastructure-related issues, such as VPN server checks, technical problems, and more.

Expertise

- I'm always sharpening my technical knowledge and seeking to learn new technologies.
- Ease of cooperation and communication with team members.
- Good logical reasoning and efficiency in tasks.

College

- Bachelor's Degree in Computer Science, night-time. 2024/2028. Universidade Anhanguera, Niterói, RJ.
